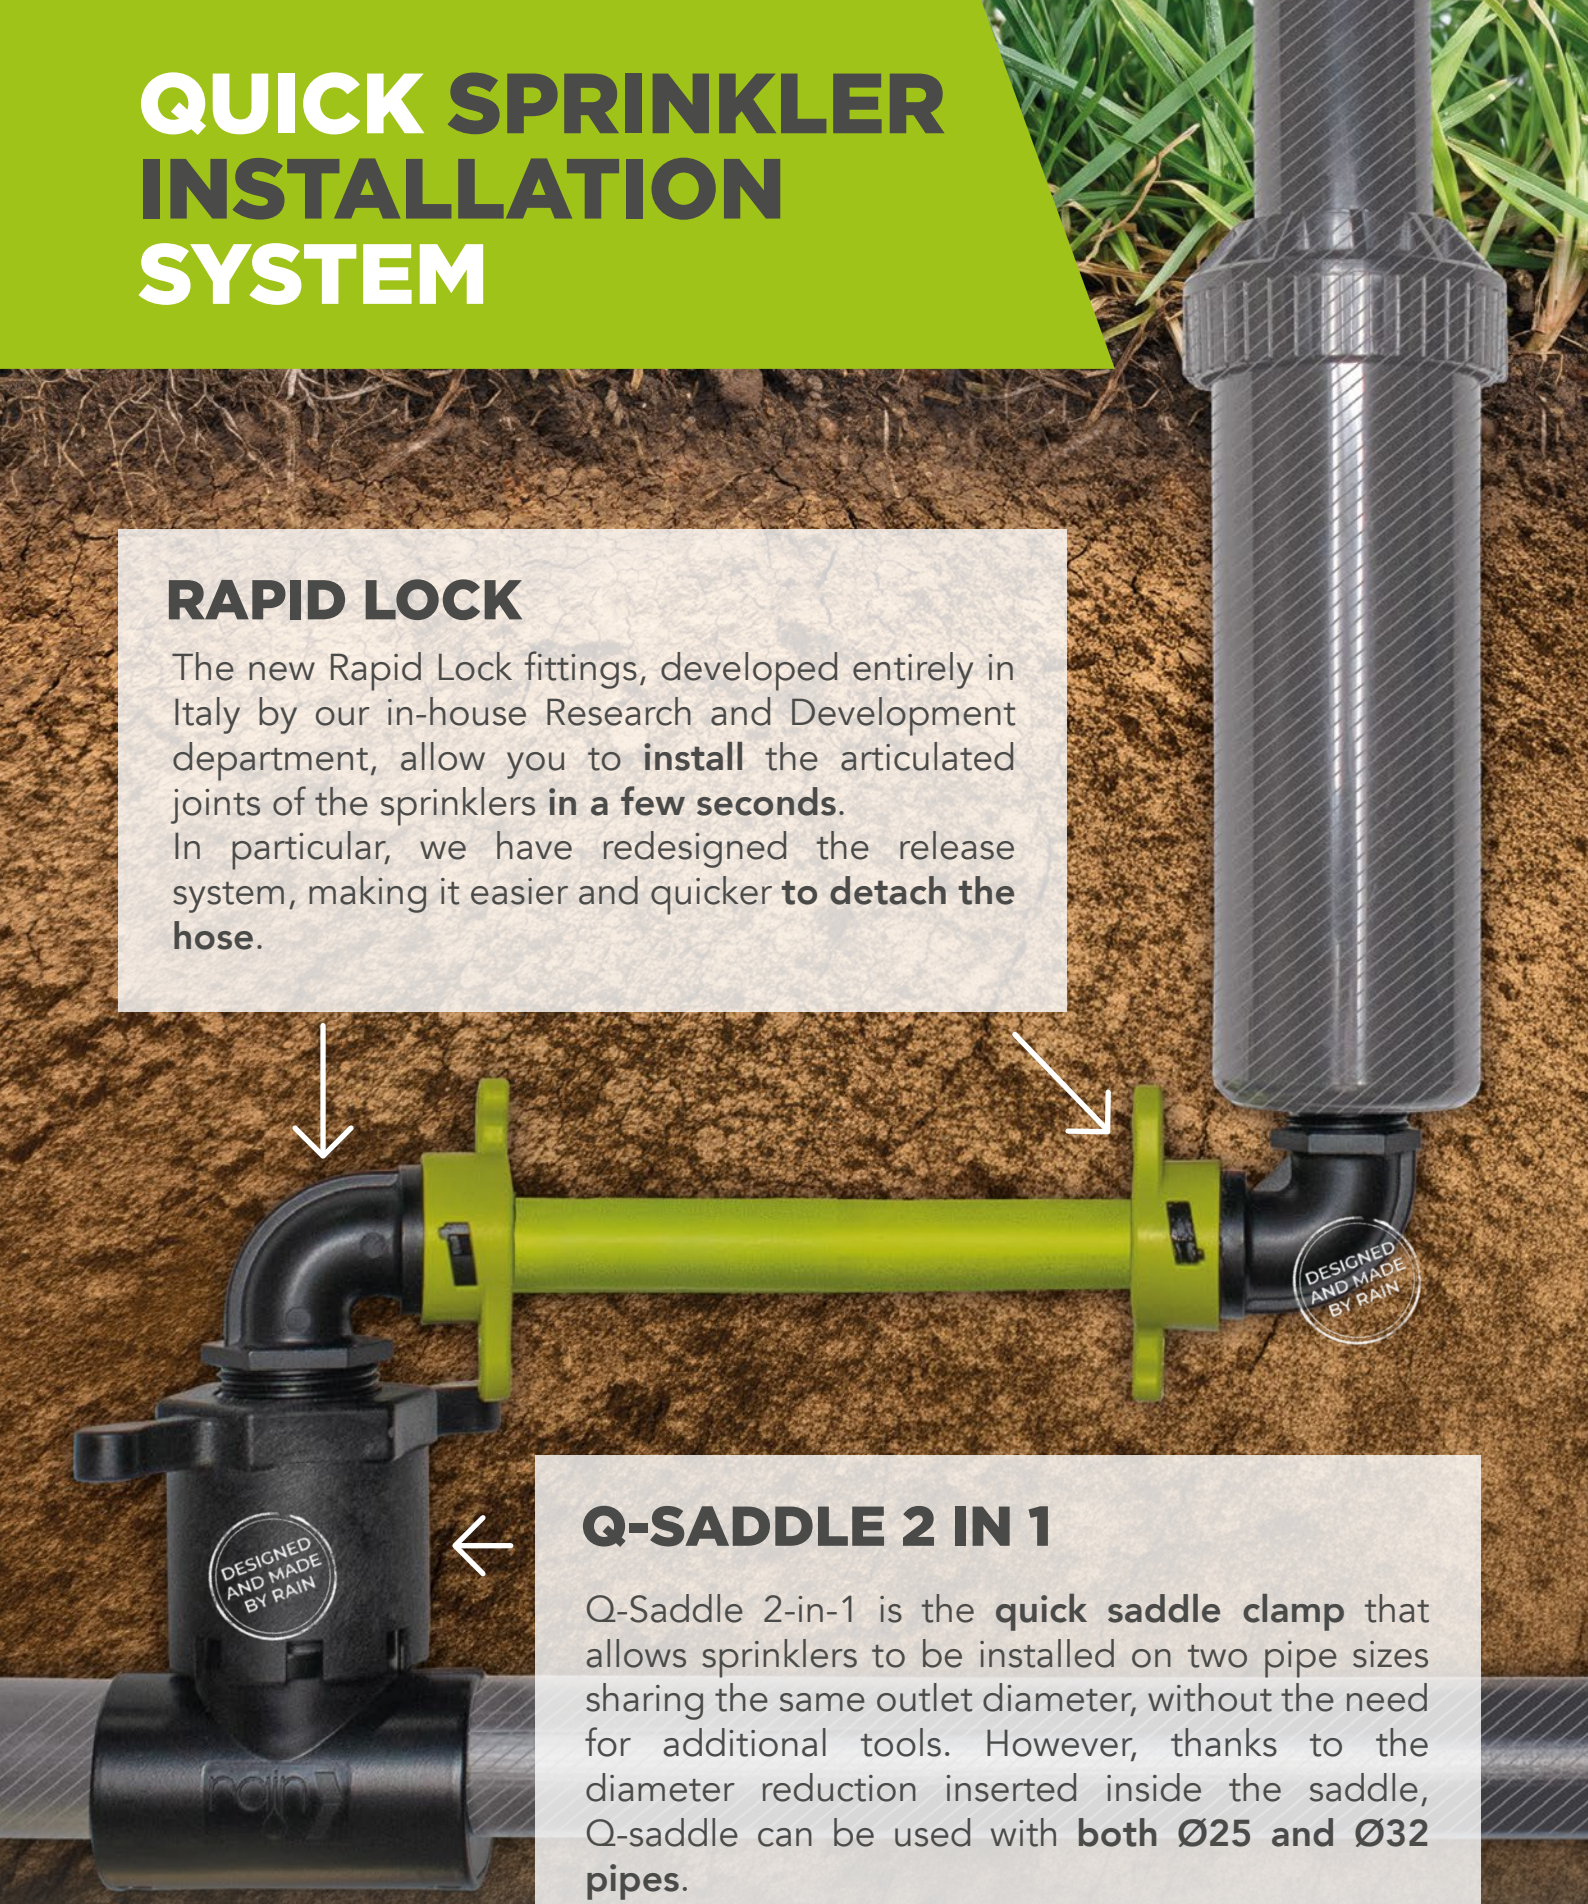
QUICK SPRINKLER INSTALLATION SYSTEM

RAPID LOCK

The new Rapid Lock fittings, developed entirely in Italy by our in-house Research and Development department, allow you to **install** the articulated joints of the sprinklers **in a few seconds**.
In particular, we have redesigned the release system, making it easier and quicker **to detach the hose**.



Q-SADDLE 2 IN 1

Q-Saddle 2-in-1 is the **quick saddle clamp** that allows sprinklers to be installed on two pipe sizes sharing the same outlet diameter, without the need for additional tools. However, thanks to the diameter reduction inserted inside the saddle, Q-saddle can be used with **both Ø25 and Ø32 pipes**.

rain.it

RAPID LOCK
FITTINGS FOR FLEXIBLE JOINT

Toothed retaining **RING** for installing the Rapid Lock Pipe

Plastic Poliymer with **PN6 RESISTANCE RATING**

Integrated high-performance **SEAL**

OPEN/CLOSE
Device for locking and unlocking the pipe

Q-SADDLE 2 IN 1
QUICK SADDLE UP TO PN6

Large grip handles to screw down the punch

The **'2 IN 1'** reduction fitting allows you to change from 32mm dia. to 25mm dia. in seconds

Locking system to block any unscrewing movement

The punch holes automatically align with the direction of the water on reaching the end of the screw down movement

The PA6 30%Fv punch allows for drilling **PE PIPES UP TO PN10**
