

SERIE 1968

SIMPLICITA *ZERO*

SO SIMPLE!

TAP TIMER THAT NEEDS
NO WATER PRESSURE
AND LETS YOU CHOOSE
THE EXACT START TIME

SERIE 1968

SIMPLICITA ZERO

IRRIGATION TAP TIMER: SIMPLE, RELIABLE AND ALWAYS ON TIME

Simplicita Zero lets you **set exactly when watering starts**, so your garden gets water at the right moment and none of it goes to waste.

The motor-driven valve opens reliably even at low pressure - or none at all - and the optional Jack rain sensor pauses watering as soon as it rains.

The metal tap connector stands up to cold weather and keeps working season after season.

ADVANTAGES

- **No water pressure** needed to open the valve
- **Simple** to programme using the dials
- **Metal** tap connector
- **Set the clock** to the current time
- **Watering time** adjustable from 30 seconds to 45 minutes
- Compatible with the **Jack rain sensor** (sold separately)
- Ideal for **vegetable plots**, gardens, terraces and **drip irrigation** systems
